PSPDFKit

12 for iOS

INTRODUCTION

Welcome Aboard

It's great to have you here! We can't wait for you to discover all the things possible with our SDK. Our primary focus is you, the developer, and how we can assist you in building incredible experiences.

Below you'll see a breakdown of all the products we offer and what they're capable of – from viewing, enabling markup, and helping your users collaborate, to support for more advanced PDF features and different file types.

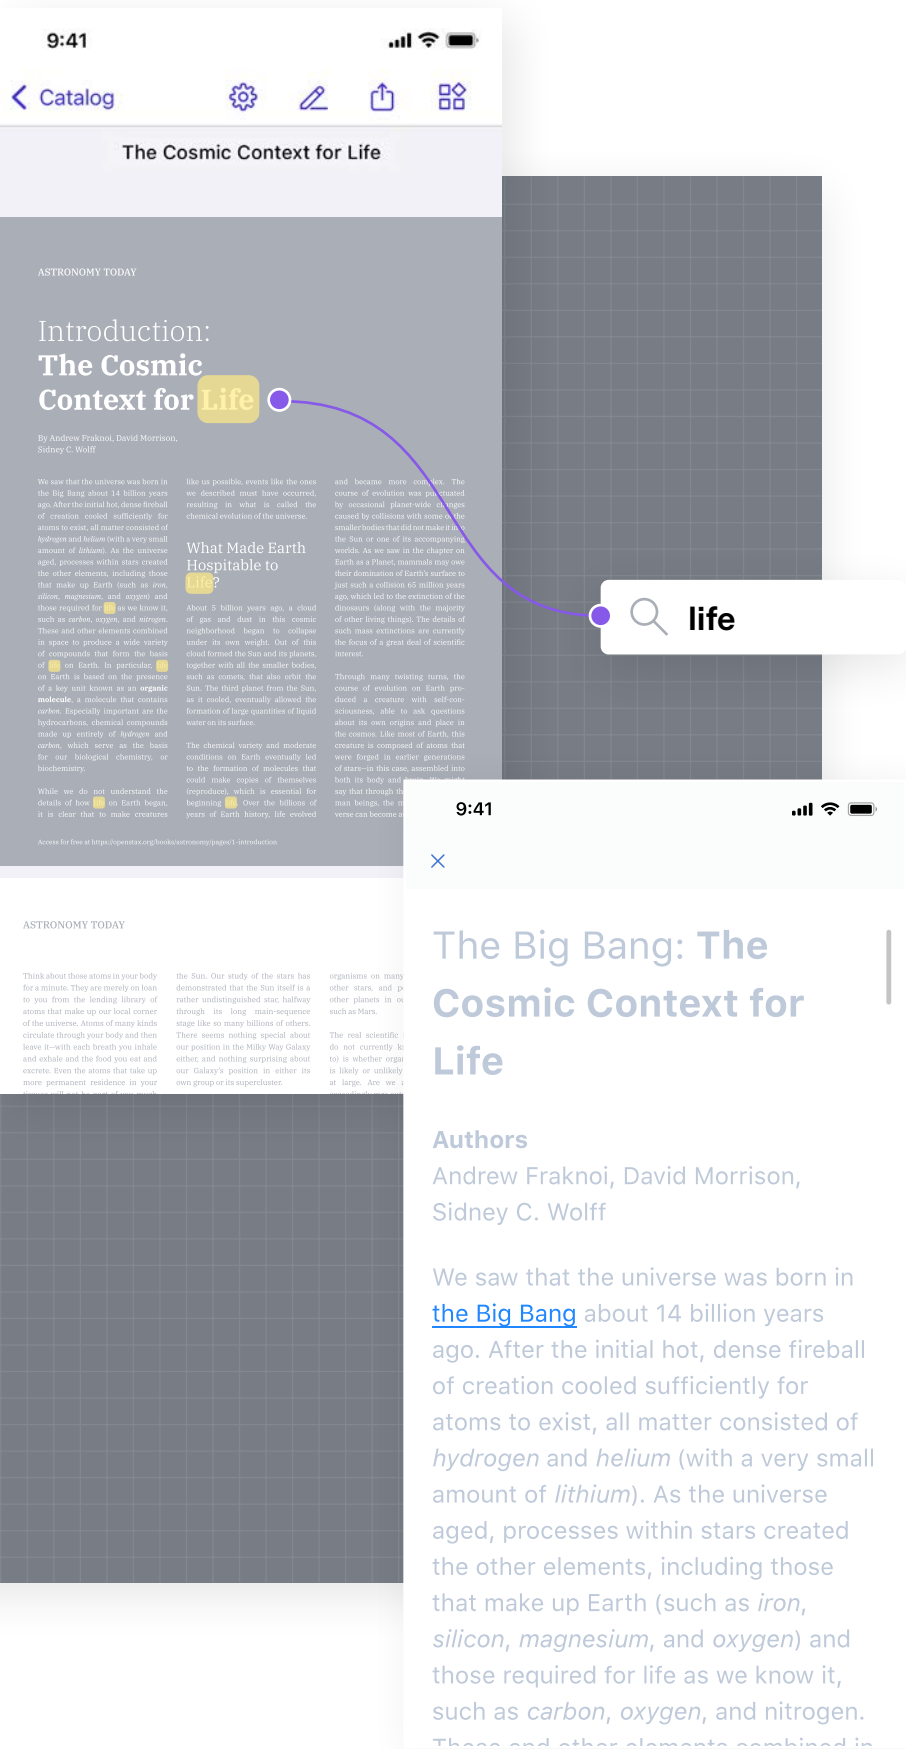

Come discover why we're the most widely used commercial PDF SDK on iOS. And always remember: We're here to help!

PRODUCTS

View Documents

Our goal: the best document viewing and reading experience for your users.

Viewer

Our Viewer is easy to use and offers quick document navigation and rendering, including the ability to incorporate multimedia content.

Indexed Search

Enables your users to search across multiple documents, languages, and encoding types with near-instant results.

Form Viewing

Access the values of objects in filled-out PDF AcroForms for additional processing.

Reader View

No more zooming or swiping around when trying to read a PDF document. Reader View puts content front and center in a simple and elegant format.

PRODUCTS

Enable Markup

Provide a true paper replacement with our document annotation and editing tools.

Annotations

PSPDFKit for iOS supports all common annotation types and comes with an intuitive style controller your users will love.

Electronic Signatures

Quickly add drawn, scanned, or typed signatures to contracts, agreements, waivers, and more.

Digital Signatures

Users can sign documents using a personal certificate, allowing instant identity verification by your app.

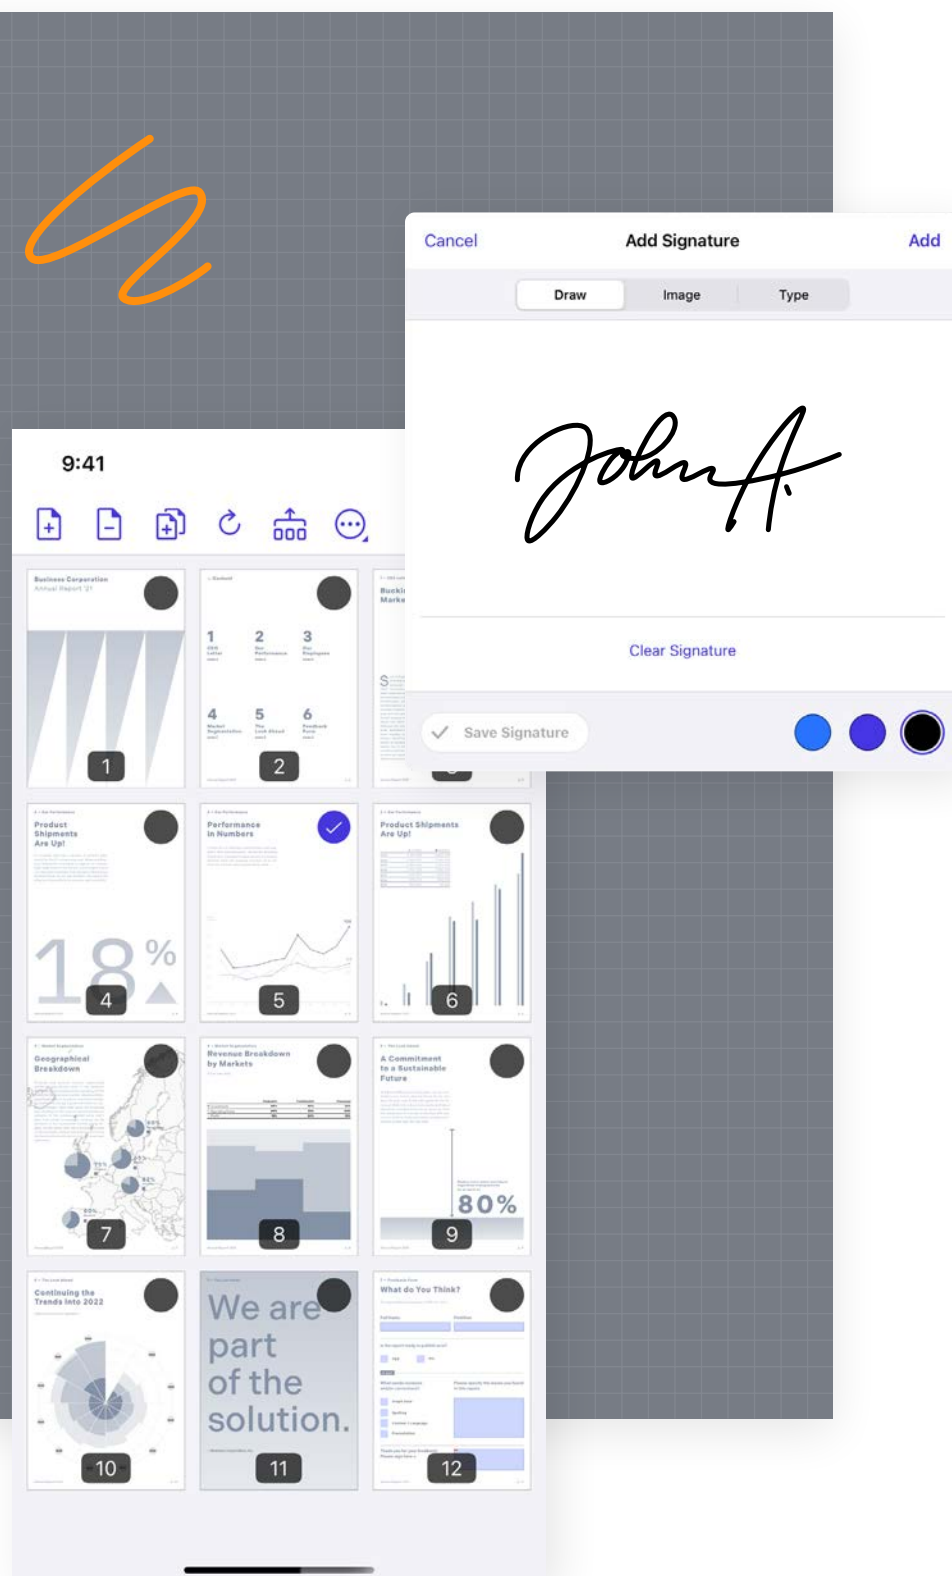

Document Editor

Unlock features like page creation, duplication, reordering, rotation, and deletion for your users.

Form Filling

By supporting PDF AcroForms, the most commonly used form standard, your users can fill out forms with ease and save their changes in a document or submit them to a server.

PRODUCTS

Empower Collaboration

Turbocharge the collaboration experience for your users with integrated productivity tools and document syncing.

This looks great!
Should we make the title more prominent?

Yes, that's a good idea.
I will highlight it more.

For the Dumplings:

1 package (25 pieces) of dumpling wrappers (store-bought or made at home), thawed out in the fridge
8 ounces shelled, deveined, and cleaned shrimp, chopped
4 ounces Asian chives (or green onions), chopped
4 ounces of soft tofu, squeezed out excess water
½ teaspoon salt
½ teaspoon ground black pepper
2 teaspoons sesame oil
1 tablespoon potato starch

For dipping sauce:

2 teaspoons soy sauce
1 teaspoon vinegar
½ teaspoon hot pepper flakes
½ teaspoon sesame seeds, crushed

Instant

Deploy effortless multi-user data synchronization that enables real-time collaboration, offline support, and data security in your apps.

Instant Comments

Built on top of our PSPDFKit Instant technology stack, Instant Comments is the drop-in solution for adding real-time document discussions to PSPDFKit for iOS.

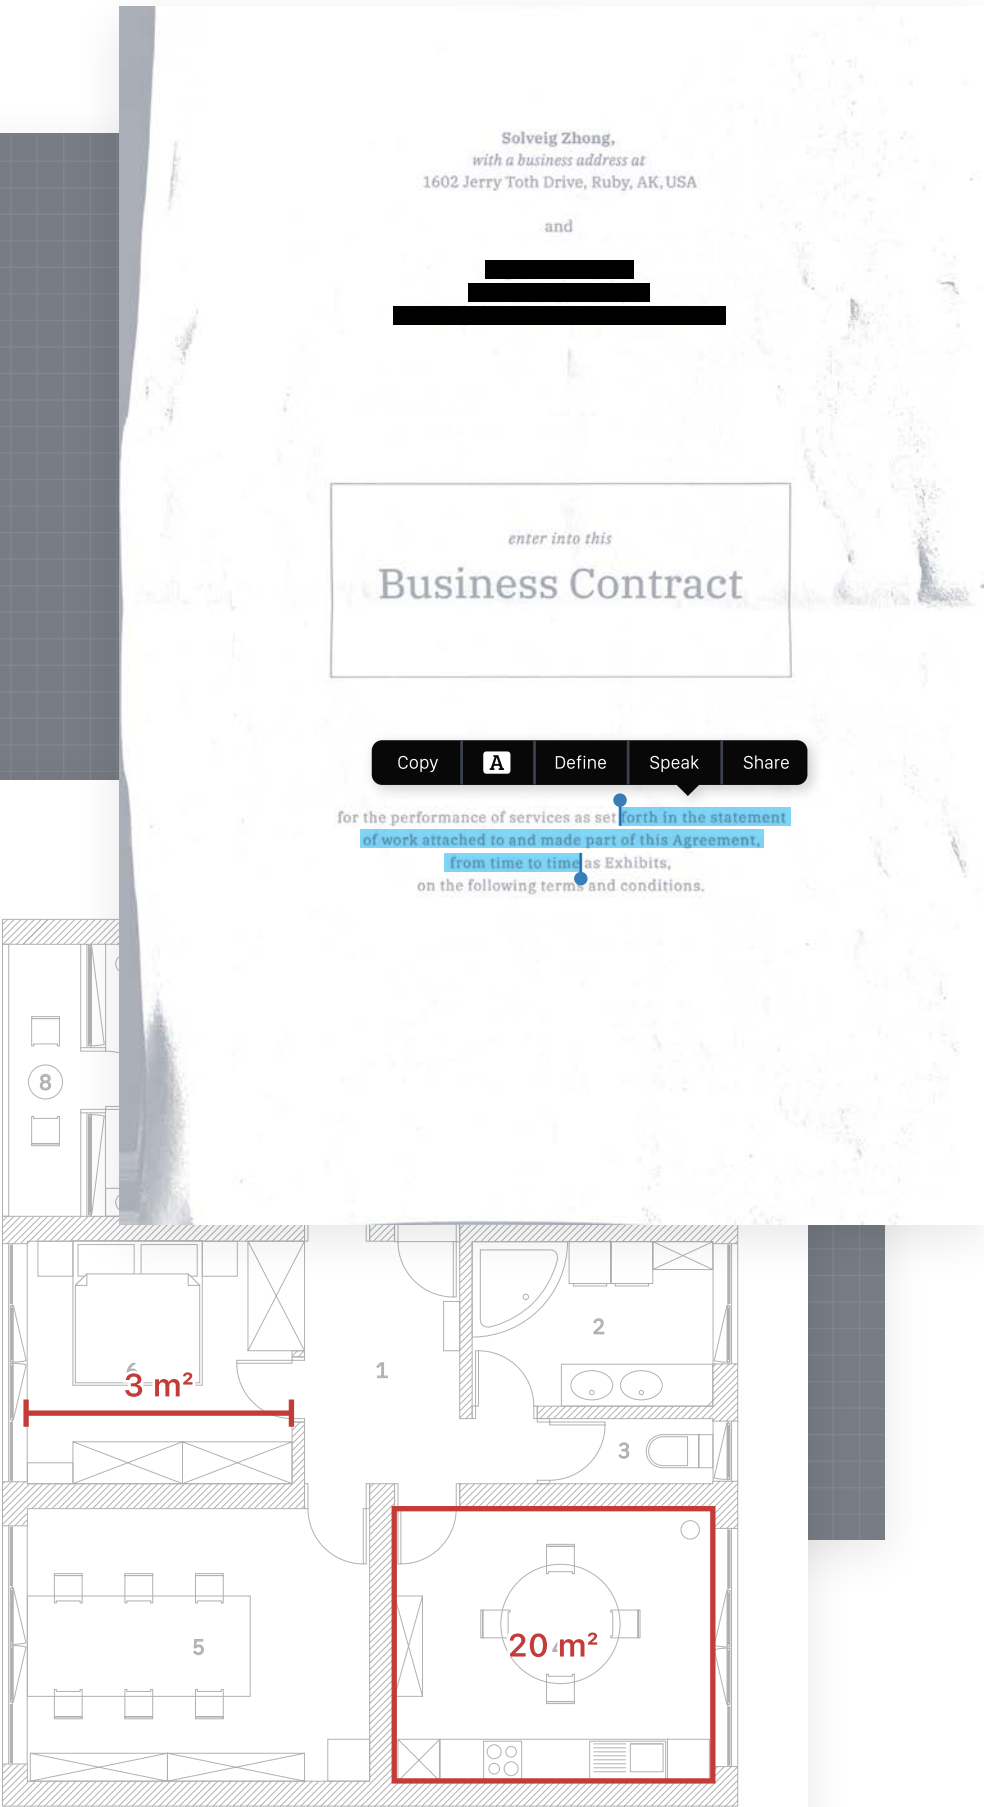

Replies

Make it easier for your users to start conversations right where they matter, without the need for external tools.

PRODUCTS

Advanced Tools

Not all PDFs are created equal — this is where our advanced document tools come into play.

Redaction

Enable your users to securely and irreversibly remove sensitive text and image content from PDFs.

Comparison

Recolor and overlay PDF pages with different blend modes — perfect for showcasing changes to the graphic elements of a page!

OCR

Our Optical Character Recognition processor enhances raster and vector PDFs to give you interactive text, unlocking the full suite of PDF tools available.

Measurement Tools

Add different measuring tools to your toolbar to enable users to measure the distance, perimeter, and area of drawings on a page.

PRODUCTS

Support Additional File Types

Extend the list of documents supported by our tools beyond PDFs.

PART ONE

Getting Started

GETTING STARTED

Integration

PSPDFKit 12 for iOS is designed for Xcode 14 (iOS 16 SDK).

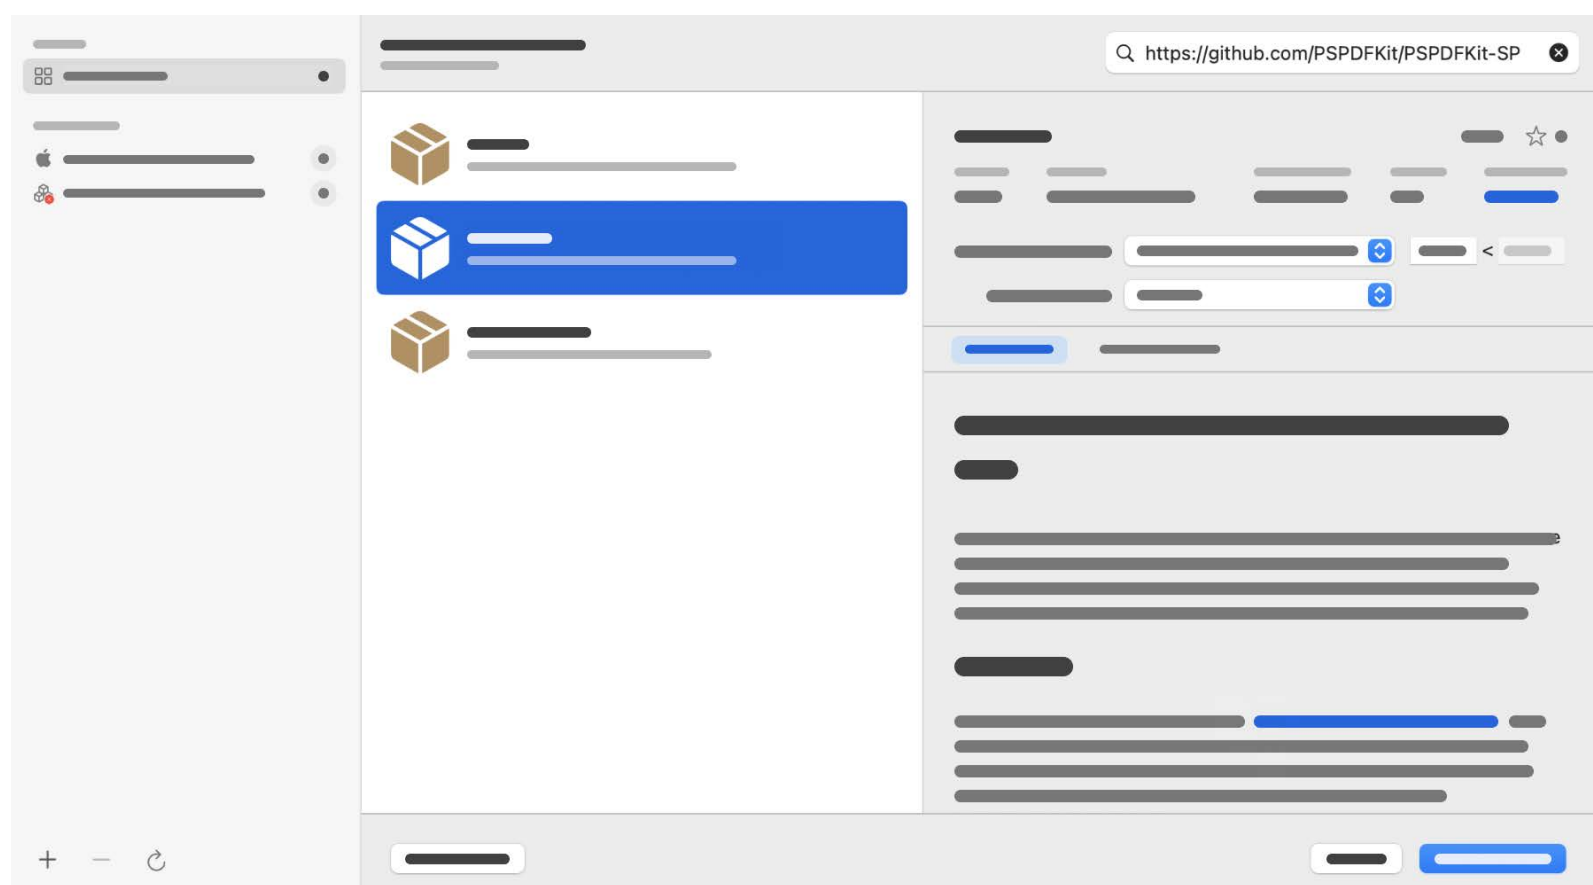

Swift Package Manager

The simplest way to use PSPDFKit is with Swift Package Manager.

We provide a URL to the public package repository that you can add in Xcode:

```
https://github.com/PSPDFKit/PSPDFKit-SP
```

CocoaPods

We provide a public URL to the [podspec](#) so you can integrate [PSPDFKit](#) with minimal effort – either by always getting the latest stable release or by pinning to a specific version.

For the stable release, use the following:

```
pod 'PSPDFKit'  
podspec: 'https://customers.pspdfkit.com/pspdfkit-ios/latest.podspec'
```

Or, alternatively, use a specific version (e.g. 12.0.0):

```
pod 'PSPDFKit'  
podspec: 'https://customers.pspdfkit.com/pspdfkit-ios/12.0.0.podspec'
```

Carthage

PSPDFKit is also available via Carthage. You can find your public URL in the Use Carthage tab when downloading PSPDFKit in the Customer Portal.

To always use the latest available version, add this to your [Cartfile](#):

```
binary "https://customers.pspdfkit.com/pspdfkit-ios.json" >= 12.0
```

Manual Integration

For information on how to manually integrate PSPDFKit, see our [Getting Started](#) documentation.

GETTING STARTED

Swift

Here's a simple example for using PSPDFKit, first in Swift:

```
import PSPDFKit
import PSPDFKitUI

// Create a `Document`.
// This is the container for your PDF file.
let documentURL = Bundle.main.url(forResource: "Document",
withExtension: "pdf")!
let document = Document(url: documentURL)

// Providing `PDFConfiguration` is optional and allows further
customization.
let configuration = PDFConfiguration { builder in
    builder.thumbnailBarMode = .scrollable
}

// Create a `PDFViewController`. This will present and manage the
PSPDFKit UI.
let pdfController = PDFViewController(document: document,
configuration: configuration)

// Present the `PDFViewController` within a `UINavigationController`
to enable the toolbar.
present(UINavigationController(rootViewController: pdfController),
animated: true)
```

Examples

This example and more can be found in the **Examples** folder of the PSPDFKit download package.

GETTING STARTED

Objective-C

Let's use the same example as before,
but this time with Objective-C:

[OBJ-C]

```
@import PSPDFKit;
#import PSPDFKitUI;

// Create a `PSPDFDocument`.
// This is the container for your PDF file.
NSURL *documentURL = [NSBundle.mainBundle URLForResource:@"Document"
withExtension:@"pdf"];
PSPDFDocument *document = [[PSPDFDocument alloc]
initWithURL:documentURL];

// Create a `PSPDFViewController`. This will present and manage the
PSPDFKit UI.
// Providing `PSPDFConfiguration` is optional and allows further
customization.
PSPDFViewController *pdfController = [[PSPDFViewController alloc]
initWithDocument:document configuration:[PSPDFConfiguration
configurationWithBuilder:^(PSPDFConfigurationBuilder *builder) {
    builder.thumbnailBarMode = PSPDFThumbnailBarModeScrollable;
}]];

// Present the `PSPDFViewController` within a `UINavigationController`
to enable the toolbar.
UINavigationController *navController = [[UINavigationController
alloc] initWithRootViewController:pdfController];
[self presentViewController:navController animated:YES
completion:NULL];
```
